Microneedling is the process of rolling tiny needles over the skin to create small punctures in the dermis, allowing Stem Cell Essence to penetrate very deeply. This powerful regenerative therapy can:

- Reduce the skin's biological age.
- Activate metabolic processes by restoring cell function.
- Decrease wrinkles & hydrate skin.
- Increase collagen production, lifting and tightening sagging skin.

Stem Cell Essence can be safely injected.

Ethically produced in Japan and manufactured in Korea, it is sterile, safe, and rich in amino acids, vitamins, minerals, cytokines, and growth factors.

During your Stem Cell Essence facial, relax on the Omnium1 – one of only two, full body PEMF (Pulsed Electromagnetic Field) therapy mats in the world medically approved for the use of biological frequencies to increase:

- healing time
- bone regeneration
- microcirculation
- pain relief

Amie Myers, Ph.D., is the founder of PEMF Wellness. A PEMF expert certified by Swiss Bionic Solutions, Amie is also trained in intra-dermal needling. As a resident of Chapala and a retired professor from Canada, she is committed to providing the most innovative cell regeneration treatments available at Lakeside.

Treatment Details

- Cost: A Stem Cell Essence Microneedling is 3000 pesos, and a vile(s) of it can be injected for 1000 pesos each.
- Frequency: It may take several (3-8) stem cell essence facials to achieve desired results. These can be spaced from one week to one month apart. A monthly treatment is recommended.
- Aftercare: For a day, keep micro-neededled areas clean. Avoid other skin products, the sun, and do not wash face/neck. If injecting, light bruising will probably occur.
- Parking: There is parking available at PEMF Wellness.
- Booking: To book a complimentary telephone consultation or an appointment, call Amie on her cell at (+52) 332 767-3514.
